

Mirrors

Designer Illuminating Mirrors

Our range of designer illuminating mirrors will add a touch of elegance to any bathroom. Combining style with practicality, each mirror contains the latest technology to ensure your bathroom is at the cutting edge of design.

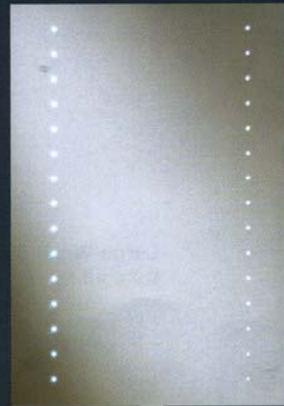

All mirrors incorporate an infrared 'no touch' switch for safety and ease of use. Simply move your hand in front of the sensor to activate the lights. Made from 5mm PVC backed safety glass and are IP44* water resistant rated for your safety and peace of mind. The internal de-mister pad ensures that the mirrors do not steam up.
